

# Role of Business Sector in Pandemic Recovery and in the Post-2020 Global Biodiversity Framework

Parallel Session 5: Ecotourism, Business and  
Biodiversity,  
7<sup>th</sup> ASEAN Heritage Parks Conference

Tania Golingi  
*Head, Environment and Ecology Department,*  
**DHI Malaysia**

# IPBES Direct Drivers of Biodiversity Loss

1

Changes in land and sea use

2

Direct exploitation of organisms

3

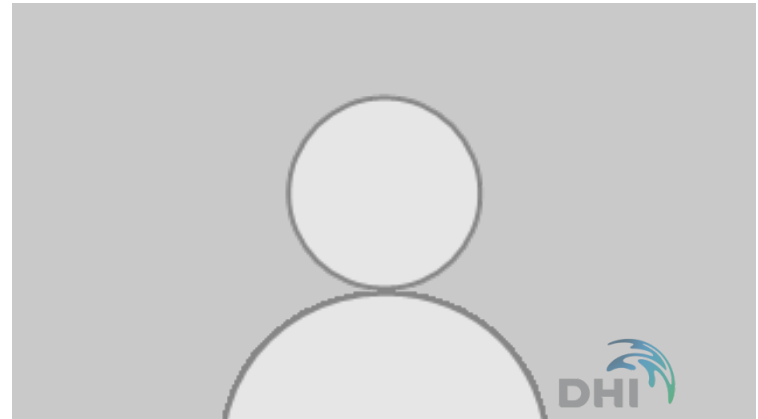

Climate change

4

Pollution

5

Invasive alien species

# IPBES Direct Drivers of Biodiversity Loss

“the underlying causes of pandemics are the **same global environmental changes that drive biodiversity loss and climate change...**

These drivers of change bring **wildlife, livestock and people** into closer contact, allowing animal microbes to move into people and lead to infections, sometimes outbreaks, and more rarely into true pandemics that spread through road networks, urban centres and global travel and trade routes.”

*IPBES Workshop on Biodiversity and Pandemics, 2020*

Today

Rapid degradation of nature and loss of biodiversity

Post-2020 Global Biodiversity Framework, to be negotiated at COP15 in December 2022

2030  
mission

*To take urgent action across society to conserve and sustainably use biodiversity and ensure the fair and equitable sharing of benefits from the use of genetic resources, to put biodiversity on a path to recovery by 2030 for the benefit of planet and people*

2050  
vision

**Living in harmony with nature**

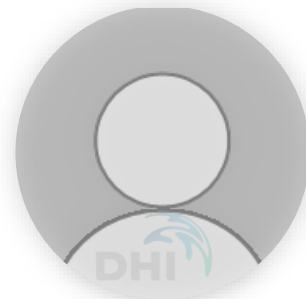

*By 2050, biodiversity is valued, conserved, restored and wisely used, maintaining ecosystem services, sustaining a healthy planet and delivering benefits essential for all people”*

## Target 15

“All businesses (public and private, large, medium and small) assess and report on their dependencies and impacts on biodiversity, from local to global, and progressively reduce negative impacts, **by at least half** and increase positive impacts, reducing biodiversity-related risks to businesses and moving towards the full sustainability of extraction and production practices, sourcing and supply chains, and use and disposal.”

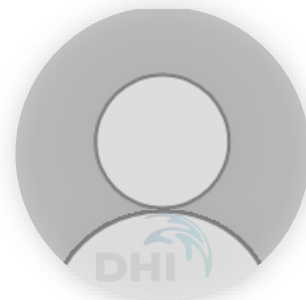

*Post-2020 GBF First Draft, July 2021*

## Target 15

“All businesses (public and private, large, medium and small) assess and report on their dependencies and impacts on biodiversity, from local to global, and progressively reduce negative impacts, **by at least half** and increase positive impacts, reducing biodiversity-related risks to businesses and moving towards the full sustainability of extraction and production practices, sourcing and supply chains, and use and disposal.”
